	12.5' x 360'	A
Strata 150 D	4' x 50'	A
Sleeve-It		B

The Sleeve-It System is an innovative solution that resolves fence integration issues with a segmental retaining wall. The system is purchased and installed by the wall contractor to facilitate fence post integration while preventing damage to vital retaining wall components such as geogrid, drainage stone, and wall blocks. Since the system is able to be installed directly behind the wall face, it allows the wall contractor to backfill and compact without obstruction. The corrugated HDPE cylinder and lid is designed to handle the weight of backfill soils, vibratory compactors, and moisture related conditions during long periods of inactivity between the end of wall constructions and the actual fence install. Pre-engineered for building code compliance, the Sleeve-It System is sure to be a favorite for contractors, the design community, and code officials.
